Remote CARI (rCARI) Validation Study

Burkina Faso Sampling

RAM-N – rCARI Team | May 2024

Objective

- **Objective is to validate the remote Consolidated Approach for Reporting Indicators of Food Insecurity (rCARI) – Using a survey experiment with stratified sample**

WFP World Food Programme

Inclusion criteria [ADMIN level selection]

- Mobile phone penetration
    - Mobile phone network
- Accessibility
- Heterogenous in terms AFI
    - Rural & urban
    - CARI groups of AFI

These factors informed the final ADMIN selection

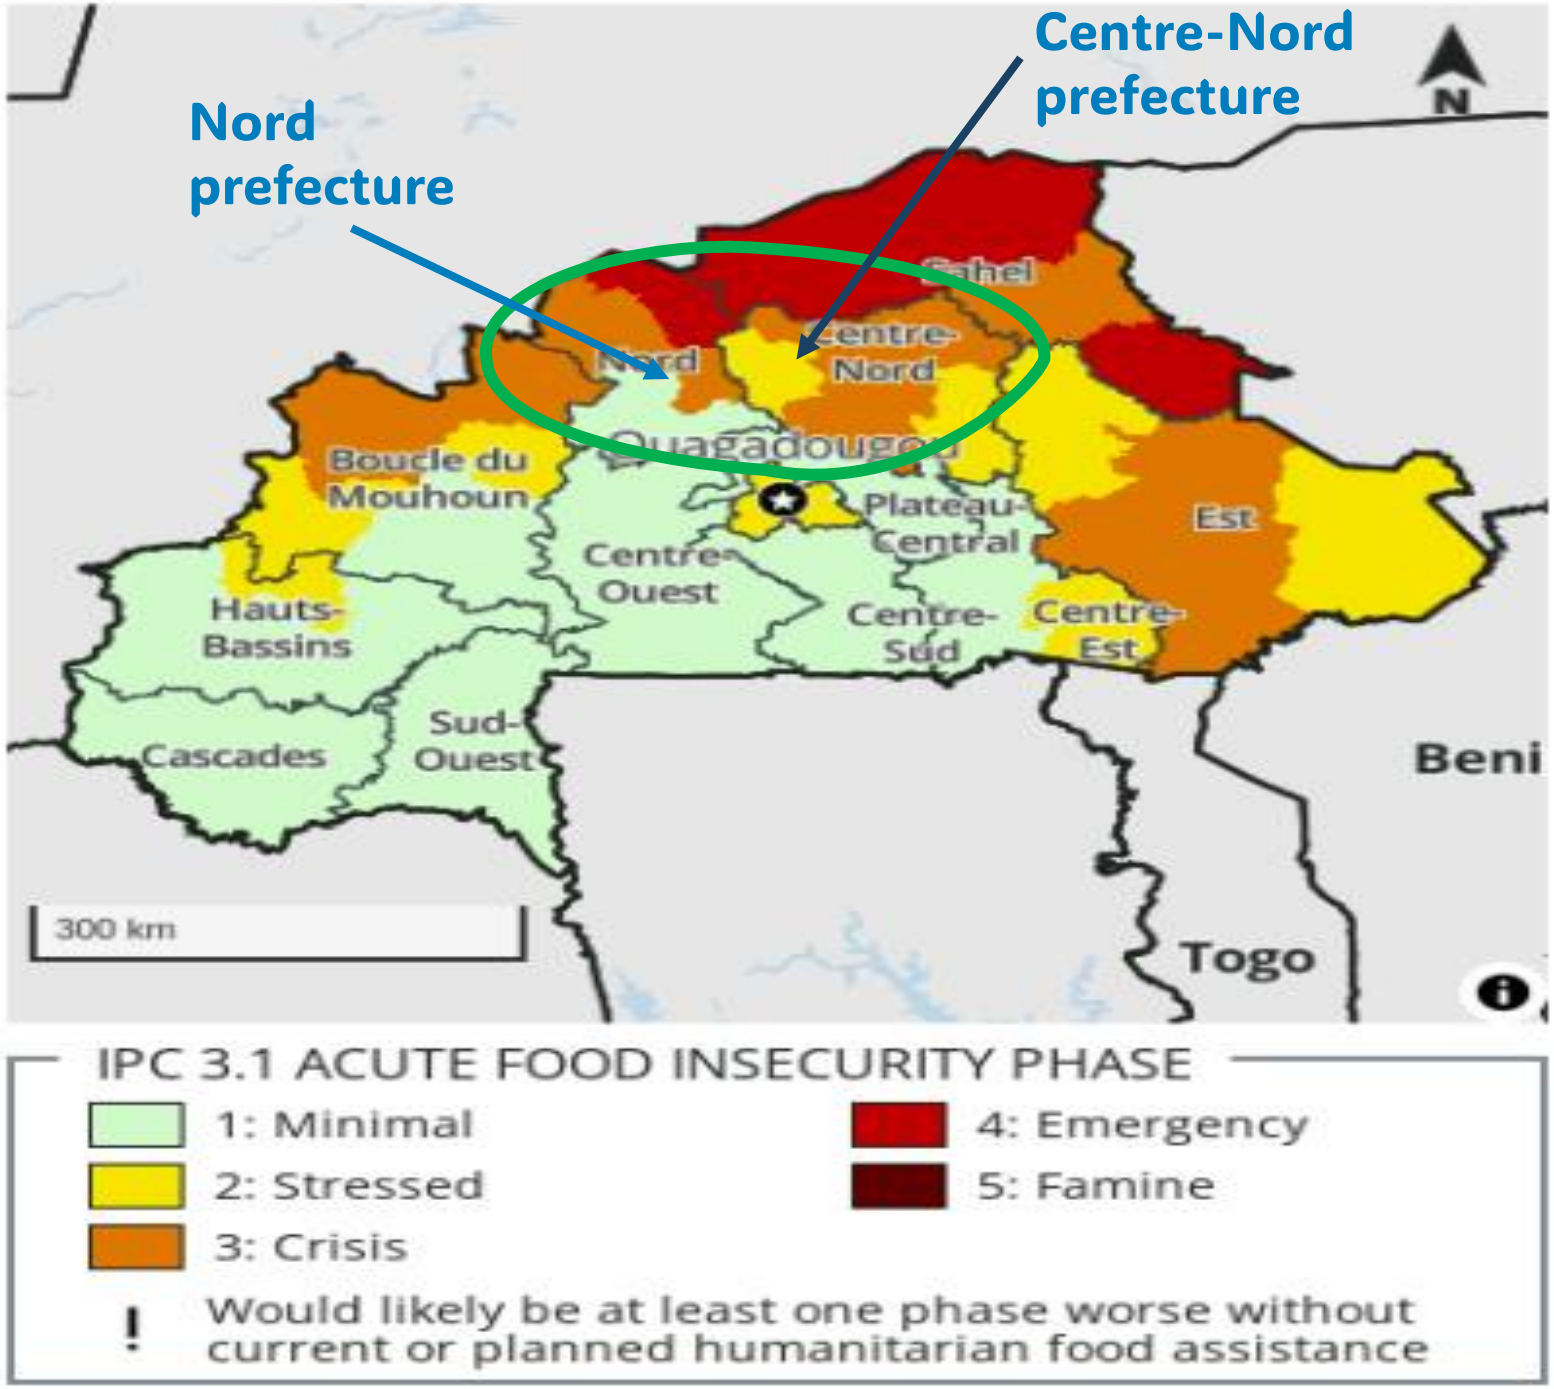
Study areas



WFP World Food Programme

Selection of Households

- Sampling frame = All households in selected ADMIN5 areas
  - Conduct village census of all selected ADMIN5s
    - (Trained and conscientious enumerators)
  - Standardized listing instrument to be used
    - Collect basic demographic and other HH observable characteristics
  - Final sampling frame = HHs that have consented to participate during the listing

WFP World Food Programme

Selection of Households

- **Using a confidence level 95%**
  - **5% margin of error**

$$\text{Sample Size} = \frac{(\text{Z} - \text{score})^2 \times \text{StdDev} \times (1 - \text{StdDev})}{(\text{confidence interval})^2}$$

    - **Min. sample (2 sample mean test) = 800hh (completed sample at least 400 hh per modality)**
  - **Final sample size = 4000HH (2000 hh per modality)**

Randomization

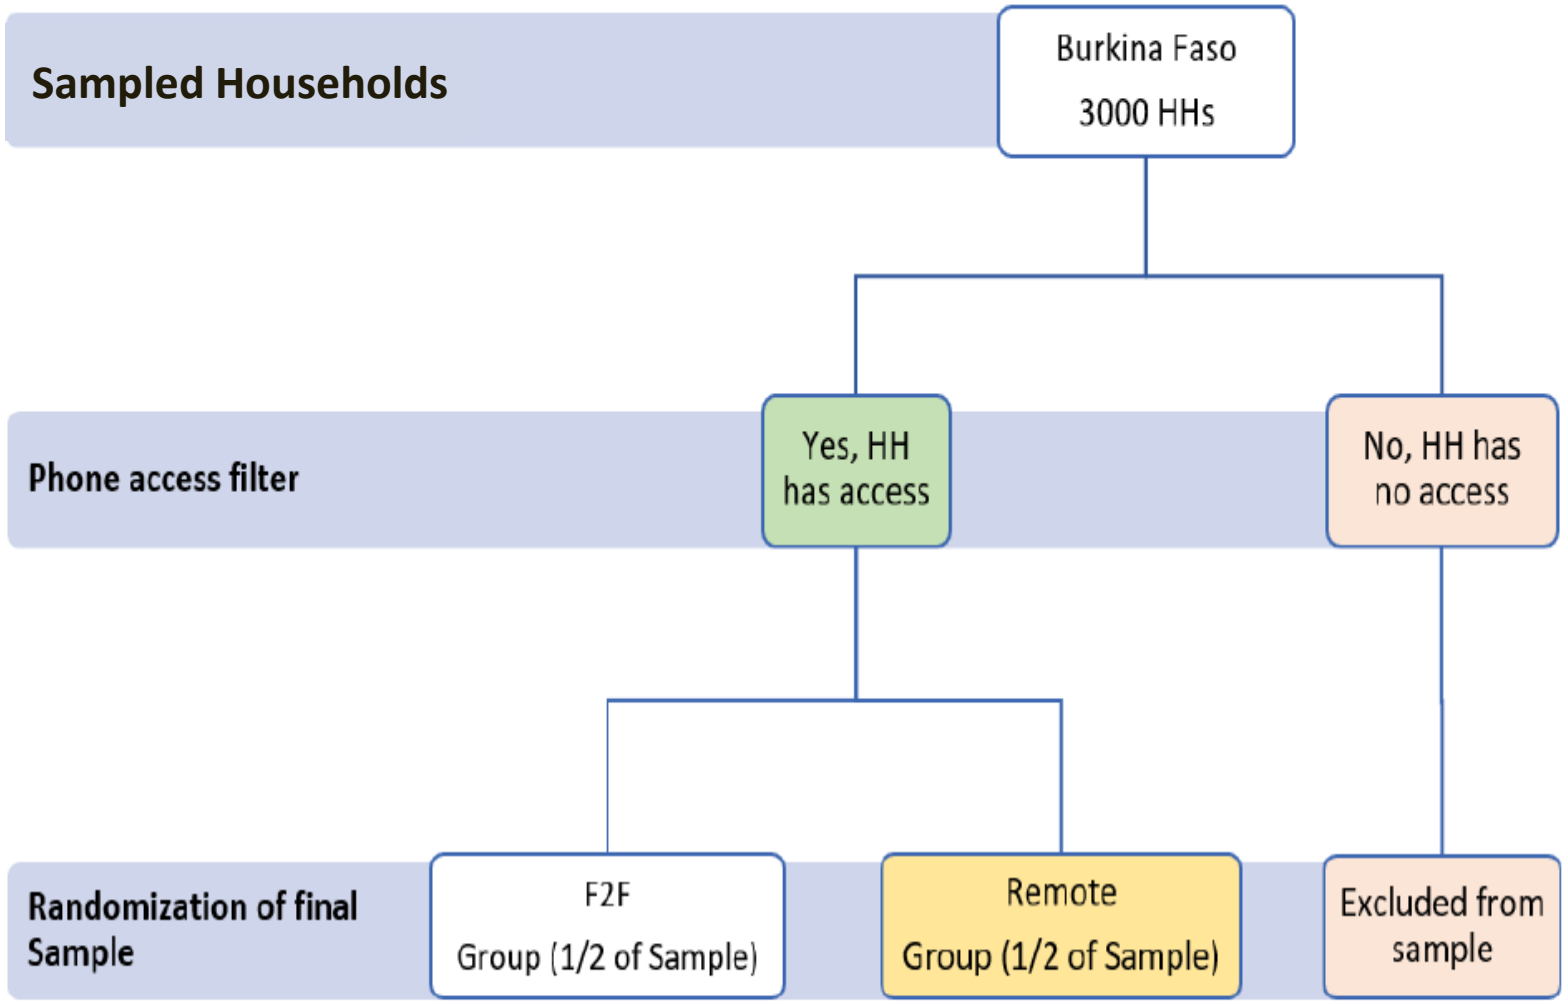

Figure 3: Step by step randomization of the survey sample

WFP World Food Programme

Training & assignment of enumerators

- Enumerators selection…
  - At least a university degree
  - Firsthand knowledge of the study area & speaks local language/dialect
  - Prior data collection experience
  - Selected persons will undergo 5-day in person training (protocols for both F2F and remote) with a one full day field test

WFP World Food Programme

Possible limitations & suggested mitigation strategies

- Geographical variation in the distribution of respondents
    - Study areas will be purposively selected to cater to geographic variations
- Enumerator effects (gender, training and motivation)
    - Consciously hire more females for the remote
    - At least two enumerators per village
    - Enumerator assignment will be random (F2F)
- High attrition particularly in the remote cohort
    - Follow strict call protocol

WFP World Food Programme

Survey protocols to enhance response rate

- Enhanced community engagement & collaboration through local authorities, stakeholders, and opinion leaders at ADMIN5 level
  - Build trust, support and cooperation
- Sensitization during the census/listing phase
  - Choose their timing of convenience to be interviewed
- A comprehensive training on the calling protocol for remote cohort
  - Introduction
  - Consent
  - Questioning techniques
  - Ethical considerations

Tentative timelines...

Activité \ L'heure	2024				2024				
	W1	W2	W3	W4	W5	W6	W7	W8	W9
1. *Adapting the Questionnaire to BF*	Completed								
2. *Compiling list of households with contacts*									
3. *Training of Enumerators*									
4. *Testing of Questionnaire*									
5. *Data Collection*									
6. *Final Dataset & Report*									

Note W=Week
