INTERVIEWER'S TRAINING MANUAL

I. BACKGROUND

Food insecurity is a multidimensional concept, requiring the use of several indicators to analyze the different dimensions. Several methods have been developed to measure the extent and severity of acute food insecurity over time. Humanitarian actors are faced with an increasingly difficult situation, as food needs have grown considerably in recent years. In 2021, at least 193 million people in 55 countries/territories were acutely food insecure (IPC/CH phase 3 or higher), an increase of around 40 million people compared to 2020 (Global Food Crisis Report 2022). Similarly, on the basis of data available in 82 countries where WFP operates, it is estimated that around 345 million people will be acutely food insecure if the worsening war in Ukraine, climate change-related shocks and rising inflation associated with the global economic slowdown are taken into account (Global Operational Response Plan, 2022).

Although different methodologies currently exist for assessing and reporting on food insecurity, the level of acceptance and confidence among different stakeholders depends on the transparency, compatibility and comparability of results. In 2012, WFP adopted the Consolidated Approach to Reporting Food Security Indicators (CARI) as the standard method for measuring food security, for household-level profiling, targeting and prioritization of those in need of assistance. Since 2012, the guidelines for the consolidated approach have evolved and adjustments have been made to the aggregation procedure.

The third edition of the CARI guidelines (CARI.v3), published in December 2021, includes several methodological novelties and indicators to capture more food security and economic variables in order to better measure acute food insecurity. In addition, the onset of the COVID-19 pandemic has highlighted new challenges for traditional data collection methods with movement restrictions. WFP developed remote CARI (rCARI) as a substitute for the original face-to-face CARI methodology to fill the data gap created by the blockages associated with the COVID-19 pandemic. rCARI is of practical interest for measuring food security in emergency situations where rapid operational decisions are required, and for traditional face-to-face methods such as CARI. Proof of this is that it was used at the height of the COVID-19 pandemic and the ongoing armed conflict in Ukraine to assess and report on food security and other humanitarian crises.

II. SURVEY OBJECTIVES

The overall aim of the survey is to assess the food situation of households in order to validate the following indicators to support programming decisions.

Specifically, quantitative data will be collected on :

Side 2 side	Remote/ à distance
▪ Household demographics ;	▪ Household demographics (shorter)
▪ Le consent	▪ Le consent
▪ Health of household members ;	▪ -----
▪ Perceptions of food insecurity ;	▪ -----
▪ Household Hunger Scale (HHS) ;	▪ -----
▪ Household food consumption (FCS/FCS-N) ;	▪ Household food consumption (FCS) only
▪ Reduced livelihood strategies (rCSI - gender-based) ;	▪ Reduced livelihood strategies (rCSI - gender-based) ;
▪ Livelihood Adaptation Strategies to Food Needs (LCS-FS) ; ▪ Livelihood adaptation strategies for basic needs (LCS-EN);	▪ Livelihood Adaptation Strategies to Food Needs (LCS-FS) ;
▪ Expenditure - food - 7 days (14 groups); non-food - 30 months (10 groups) ; & non-food - 6 months (8 groups)	▪ Expenditure - food - 7 days (4 groups); non-food - 30 months (4 groups) ; & non-food - 6 months (1 group)
▪ Food assistance (ENA);	▪ -----
▪ Household income (3 sources)	▪ Household income (1 source)
▪ Food insecurity scale based on experience (FIES)	▪ -----
▪ Accommodation ; ▪ Water ; ▪ Household assets ; ▪ Basic electrical items ▪ Advanced electrical items ▪ Transportation assets	▪ - ▪ Water ;
▪ safety	▪ -----
▪ Minimum food diversity (MDDW)	▪ -----

III. GENERAL INSTRUCTIONS TO INTERVIEWERS

III.1. Introduction

Once in a village/quartier and before starting the survey, the team leader and all other team members MUST introduce themselves to the local administrative authorities (prefects, mayors, local gendarmerie and/or police station chiefs, local councillors and/or village/quartier chief) and explain the purpose of the survey.

The household questionnaire is administered in the home of the selected household. Before starting the discussion is important, whatever the context. For example:

"(1) **My name is ${EnuName_Display}** and (2) I'm part of a team of surveyors conducting a study on behalf of the **World Food Program** to better understand your household situation. The interview will cover information relating to (3) your household's **food security**, livelihoods and general living conditions, as well as your needs. (4) The information you provide is extremely important and will help us to improve the tools used to assess the food security situation and needs of households in your locality and elsewhere.
(5) Your household has been selected by chance and participation is voluntary. (6) All information collected during the interview is **strictly confidential** and will be used only for scientific purposes, without allowing you or your household to be identified. Similarly, no information concerning you or any other member of your household will be disclosed or given to any person(s), institution(s) or authority(ies). Your participation is greatly appreciated and will not influence your assistance status (assisted or not).
If you don't understand any of the questions, please say so and I'll explain. (7) Could you spare a little time (about 60 minutes) for the interview?

Key points

1. Introduction - **name**
2. With whom - **PAM & ICASEES**
3. The goal - **food security (not linked to assistance)**
4. **The importance of this study**
5. **Why this household - by chance and on purpose**
6. **Confidential**
7. **Consente - yes/no**

After this introduction, the following steps must be scrupulously observed:

1. The interviewer should mainly **talk to the head of the household**, but some questions can be assisted by the presence of the spouse. In the absence of the head of household and her/his spouse, you can talk to any adult member of the household who may be familiar with the household situation. An adult is considered to be any person aged 17 or over, with at least primary school education, who can speak for the head of household. The respondent should primarily be able to **talk about household food consumption and expenditure, access to health care, etc**.
2. If the head of the household or the person able to answer questions about the household is absent from the household at the time of the visit...
    a. ...the interviewer must ask household members who are present and/or neighbors when these people eligible for the survey will be back.

   b. If the person(s) you are looking for is/are in the vicinity, you will be asked to go and find them. look for.
   c. If they will be back during the team's stay in the village/neighborhood, then the interviewer will set up an appointment and return to survey the household and eligible people at the date and time set.
3. Data collection will be **carried out** entirely **with tablets/smartphones**. Please use this **guide to help you understand data collection**, as we will not be printing hard copies of the questionnaires.
4. **Check the data** on each questionnaire before leaving the surveyed household.
5. **The team leader will double-check** the questionnaires before handing them over to the waiter.
6. Revisit households to complete any incomplete and/or incorrectly filled-in questionnaires as many times as necessary.
   as necessary at the request of the team leader, supervisor or survey coordinators.
7. **Inform the team leader of any difficulties** arising from the application of a given instruction, who will then advise on the appropriate course of action.
8. Be fully **responsible for the equipment** assigned for the duration of t h e survey and for its proper use. (tablets and smartphones).
   a. Before you even start your interview, make sure **your smartphone/tablet has enough battery power** and that the questionnaire is working properly.
   b. At the end of the day, make sure your equipment is ready for the next day: smartphone/tablet recharging should always be planned in advance, especially in more remote areas where lack of electricity can be a problem.

All team members must bear in mind that the success of this investigation depends on their seriousness in rigorously carrying out the instructions given to them. Nothing they are asked to do as part of the investigation is superfluous. All instructions must be followed, and they can't change them on their own initiative, as they are based on the imperatives of the method developed by the technical managers. In case of doubt, the investigator must discuss the matter with the team leader, and in the same way the team leader must contact the supervisor and/or an investigation coordinator.

III.2. Before starting the survey

The following steps are important for a successful interview:

- **Interviewers must therefore be flexible and ready to administer questionnaires at times that are most convenient for the households surveyed**.
  - Try not to arrive at the respondent's home at an inconvenient time, such as at the mealtime.
  - Try to arrive when the respondent is not too busy to answer your questions.
  - In rural areas, most households are likely to be out in the fields during the day, so households are likely to be surveyed very early in the morning before leaving for the fields, or in the evening after returning from the fields.
- **Make sure you understand the exact purpose of each question.** This will help you determine whether the answers you receive are appropriate. If you have any doubts, please do not hesitate to contact supervisor or to ask the question in other terms.
- **Note any relevant observations** about the surveyed household likely to influence the analysis data, in a notebook and then, in the last question of t h e survey (comments).
- **Thank the respondent for his or her cooperation**. Remember the time constraints of the survey and don't stay too long chatting.

IV. Other important recommendations

IV.1. Win the respondent's trust

- **Dress appropriately**: Your appearance will determine the first impression you to the interviewee. The way you dress can influence the interview and contribute to success or failure. Dress appropriately and simply. Local examples...?
- **Be respectful** of the village's **cultural** values **and traditions.** Local examples .... ?
- **Introduce yourself by stating your identity**. Explain clearly the purpose of the investigation and why you want to interview household members.
- Be prepared to explain what is meant by **confidentiality**, and also to **persuade respondents** to participate if they are reluctant.
- If the respondent **refuses to be interviewed,** note the reasons on the questionnaire.
- Drive **casually**, but be **conscientious**.
- **Remain calm and polite** at all times. Always adopt a **neutral and professional** demeanor.
- Take an **unprejudiced, preconceived** approach to data collection, **don't anticipate the answers**, but make sure you've clearly formulated the purpose of the your question to the respondent and what you're looking for.
- **Demonstrate your mastery of the questionnaire** to win the confidence of the caller.

IV.2. Insist on adequate answers

- Ask all questions, even if the respondent answers two at a time. You can also explain that you have to ask each question individually, or say "**Just to be** sure....." or "**Just to refresh my memory.....**"and then ask the question.
- **Ask the questions in** the same order as they are recorded on the smartphone/tablet.
- Help respondents to **feel at ease**, but be careful not to **guide the answers to** your questions.
- If necessary, ask the respondent to **clarify his/her answer**. You may have misunderstood the respondent's answer.
- **Record answers immediately**.
- **Pause and wait** if the respondent tries to remember difficult things.
- Even if you have to rephrase questions, especially in the case of translated questionnaires, it's always a good idea to ask the same questions again.
  important to be consistent with rephrasing and <u>not to change the meaning of questions</u> and definitions.

IV.3. Behaviours to avoid Do not :

- Violate the informant's privacy by asking sensitive questions / Ask the population for information that does not appear on the questionnaire. (**<u>Do not ask questions that are not in the questionnaire</u>**). Local examples ....?
- <u>Violate the informant's privacy</u> by gaining unauthorized access to documents containing personal and confidential data.
- <u>Communicate to any other person outside the operation</u> the information gathered during the collection, or make it a subject of comment.
- <u>Smoking</u> in the household.
- <u>Interrupt</u> or shorten the interlocutor's answers.

- Make positive or negative judgments about the interlocutor's answers.
- Being indiscreet.
- Demand/give gifts or make promises to respondents.
- Show collection data to anyone not involved in the operation.
- Being accompanied or assisted in his work by other people without special authorization of those in charge of the survey.
- Carry out extra-professional activities (trading, advertising, etc.).
- Delegate your duties as investigating agent to a non-team member of the CARI study.
- Giving up your job as an information-gathering agent before you've done it all completed.

IV.4. Special instructions for administration and filling

The information gathered and recorded on the questionnaires will constitute a database intended for wide use. For this reason, the information gathered must be reliable, so as not to bias the analyses or lead to conclusions that are inconsistent with the realities on the ground. The work carried out by the interviewer must be free of false information.

You must therefore take great care when filling in the questionnaire and never lose sight of the following principles:

- Avoid double counting and omissions (for example, count the newborn baby as well as the elderly or sick person in the household; don't forget to count the head of household).
- Note that in some cases, it's not necessary to ask questions (when indicated, for example, for roofing materials); don't ask the question if the answer is known or you're not sure.
  (for example, if it's a woman standing in front of you, don't ask her gender).
- Do not list modalities/options to the respondent, except when specified in the question.
- The interviewer must collect one answer to each question asked.

NOT MAKING PROMISES OF FOOD ASSISTANCE TO THE HOUSEHOLD

V. SOME BASIC CONCEPTS

Household definition: A household is defined as a group of people (one or more), whether related or not, who usually live in the same dwelling, share the same meal, manage all or part of their resources in common, and recognize the authority of the same person called the head of household.

The head of the household is the person declared and recognized as such. He generally holds the authority economic power. It doesn't have to be the oldest or the man.

In this case, **the residence criterion** is materialized by the fact of usually living together and for a more or less long period (at least 6 months) in the same dwelling. Members who have been away for more than 6 months and have no plans to return should generally not be considered part of the household.

Age of head of household: if the respondent is unable to give his or her exact age, ask him or her to show you his or her identity card/birth certificate/driver's license/or any other administrative document that will enable you to identify the head of household.

age. If all this is not available, try to estimate based on local events that took place during the period he/she was born.

Childbearing age[1] **:** According to the World Health Organization (WHO), the reproductive age for women is is from age 15 to 49.

QUESTIONNAIRE

VI. DEMOGRAPHIC CHARACTERISTICS

Questions	Answers
Gender of respondent ***By observation!***	/____/ 1)Female, 2)Male
Gender of respondent ***By observation!***	/____/ 1)Female, 2)Male
Gender of respondent ***By observation!***	/____/ 1)Female, 2)Male
Gender of respondent ***By observation!***	/____/ 1)Female, 2)Male
Age of respondent	/____/ Figures
What is the respondent's marital status?	/____/ 1)Single, 2)Cohabiting, 3)Monogamous married, 4)Divorced/Separated, 5)Widowed 6)Polygamous married
What is your household's residency status?	/____/ 1)Permanent resident, 2)Displaced, 3)Refugee, 4)Returnee, 5)Repatriate, 6)Migrant, 7)Other (specify)
When did the head of the household get here?	/____/
Did you have the choice to leave?	/____/
Does your household currently accommodate or or families displaced or refugees?	/____/ Yes/No
Do members of this household possess identity documents such as: 1. national identity card, 2. driver's license, 3. refugee card, 4. birth certificate, 5. certificate of nationality, 6. passport, 7. voter's registration card? NB: ID numbers are not required for this study; it's just a question of possession.	/____/ Yes/No
What is the total number of members in your including yourself?	/____/ Figures

reproductive-age-(15-49-years)-population-(thousands)

Block of questions on household demographics: Repeat questions for each household member *[Interviewer: Please start answering the following questions with the respondent and move on to the oldest member of the household, continuing to the youngest member].*	
Block of questions on household demographics: Repeat questions for each household member *[Interviewer: Please start answering the following questions with the respondent and move on to the oldest member of the household, continuing to the youngest member].*	
What is the gender of the person in the household?	/____/ 1) Female , 2) Male
Age of person in household	/____/
Is this person the sponsor?	/____/
If yes, what is the respondent's first and last name? ➔ Just checking! It must be the same answer as before	/____/
What is its relationship with the head of the household?	/____/ 1)Head of household, 2)Wife/Partner, 3)Son/Daughter 4)Mother/Father, 5)Brother/Sister, 6)Other relationship, 7)Other marriage relationship, 8)Other no relationship
Has the household member ever attended a school or educational program?	/____/ Yes/No
If so, what is the highest level of education this person has achieved?	/____/ 1. Literate or Koranic, 2. Primary, 3. Middle, 4. Secondary, 5. Higher education, 6. Education vocational and technical (learning a trade)
What is the highest class this person has reached?	/____/ 0. None, 1. literate or Koranic, 2.CI, 3.CP, 4.CE1, 5.CE2, 6.CM1, 7.CM2, 8. Sixième, 9. Cinquième, 10. Fourth, 11. third, 12. second, 13.Première, 14.Terminal, 15. Licence, 16. Master, 17. Doctorate, 18. BTS, 19. BEP, 20. Other
Did the child member of the household attend school at At any time in the last six months?	/____/ Yes/No
Has the person given birth in the last 3 years? ***To be requested only for women of childbearing age within the last 3 years (currently aged 15 to 52).***	/____/ Yes/No
Has this person been pregnant in the last three years?	/____/ Yes/No

To be requested only for women in childbearing age within the last 3 years (currently 15 to 52).	
For the most recent pregnancy, did this person receive at least four prenatal visits while pregnant? ***To be requested only for women of childbearing age within the last 3 years (currently aged 15 to 52).***	/____/ Yes/No
During the last birth, was this person assisted by a nurse, doctor or other health professional? qualified?	/____/ Yes/No
Have the children in your household aged 6 to 59 months received at least one dose of measles vaccine? ***To be requested only if the household has children aged 6 to 59 months.***	/____/ Yes/No
Have any children in your household aged between 6 and 59 months had diarrhoea in the last two weeks? ***To be requested only if the household has children aged 6 to 59 months.***	/____/ Yes/No
Have children in your household aged 6 to 59 months received any of the following at any time since they started having diarrhea? ***To be requested only if the household has children aged 1 to 5.***	/____/ 1) A liquid prepared from a special sachet called ORS 2) Zinc tablets or syrup 3) Traditional ORS (home-made)

⚠ **Remember**: only one person per household should be marked as a **respondent**, a **head of household** and a spouse if applicable. When you have indicated more than one person, think again if you have forgotten something. It's the supervisor's role to check that only one respondent is selected, and only one head of household.

VII. The health of household members

Chronic diseases: According to the World Health Organization (WHO), a chronic disease is defined as a long-term condition (6 months or more) requiring regular treatment. These can include non-communicable **diseases** such as diabetes, cancer or asthma, but also persistent communicable **diseases** such as AIDS or hepatitis C, mental **illnesses** (depression, schizophrenia) and rare **diseases** (cystic fibrosis, sickle cell anemia, myopathies).

Physical disability: a person with a physical disorder that can affect motor skills (loss of all or part of the ability to move). The disabled person may be in a situation of dependence.

Mental or intellectual disability: a person with difficulty in understanding and a limitation in the speed of mental functions in terms of comprehension, knowledge and cognition.

Question	Answers
I'd now like to ask you about any physical or mental handicaps in your household.	
How many members of your household suffer from physical or mental disabilities?	/_____/ figure
I'd now like to ask you a few questions about your household's access to health care and healthcare services. **medical services.**	
Does your household have physical access to a health facility (e.g. where you can see a nurse, doctor, get vaccinations, receive family planning services, etc.)? *Hint: Facilities of this type include health posts (fixed or mobile) or primary health centers.* *Make sure the respondent refers to physical access, not financial accessibility.*	/_____/ Yes/No
How long (in minutes) would it take to walk to the nearest facility of this type?	/_____/ figure
Note for the interviewer, here we ask the question "During the last 30 days, did you or any member of your household need to receive treatment or undergo a medical examination for..." 4 categories of health problems : 1) **minor ailments** *such as colds, headaches or other benign conditions (whose treatment does not require a doctor's prescription*)? 2) **serious illnesses** *such as diarrhea, vomiting, respiratory infections, pain on urination, malaria or other infections*? 3) **serious chronic illnesses** *such as cancer, diabetes, hypertension, heart disease, stroke, HIV or chronic arthritis*? 4) **surgical operations and receive emergency health care,** *for example in the event of a heart attack, fracture, serious injury or poisoning?*	
In the last 30 days, have you or any member of your household needed treatment or a medical examination for **minor ailments** *such as colds, headaches or other minor ailments (which do not require a prescription*)? If so, were you able to access the service?	/_____/ Yes/No /_____/ Yes/No
If no, what is the main reason why you did not have access to the medical service?	1) Could not afford the cost of the service 2) Could not afford the cost of transport

	3) Service not available (because e.g. - healthcare staff are not qualified) 4) Unwelcoming healthcare staff 5) Other (please specify)
In the last 30 days, have you or any member of your household had to receive treatment or undergone a medical examination for **serious conditions** *such as diarrhea, vomiting, respiratory infections, pain on urination, malaria or other infections*? If so, were you able to access the service?	/_____/ Yes/No /_____/ Yes/No
If no, what is the main reason why you did not have access to the medical service?	1) Could not afford the cost of the service 2) Could not afford the cost of transport 3) Service not available (because e.g. - healthcare staff are not qualified) 4) Unwelcoming healthcare staff 5) Other (please specify)
In the past 30 days, have you or any member of your household required treatment or medical examinations for **serious chronic conditions** *such as cancer, diabetes, hypertension, heart disease, stroke, HIV or chronic arthritis*? If so, were you able to access the service?	/_____/ Yes/No /_____/ Yes/No
What is the main reason why you did not have access to the medical service?	1) Could not afford the cost of the service 2) Could not afford the cost of transport 3) Service not available (because e.g. - healthcare staff are not qualified) 4) 4) Unwelcoming healthcare staff 5) Other (please specify)
In the past 30 days, have you or any member of your household required **surgery or emergency health care, for** *example for a heart attack, broken bone, serious injury or poisoning?*	/_____/ Yes/No

If so, were you able to access the service?	/_____/ Yes/No
If no, what is the main reason why you did not have access to the medical service?	1) Could not afford the cost of the service 2) Could not afford the cost of transport 3) Service not available (because e.g. - healthcare staff are not qualified) 4) Unwelcoming healthcare staff 5) Other (please specify)

VIII. PERCEPTION OF FOOD INSECURITY

The questions below are designed to capture households' perceptions of food insecurity, with three different questions and different time periods.

Question	Answers
In the last 30 days, have you and your family worried about not having enough to eat?	/_____/ Yes/No
Which statements best reflect your food situation and that of your household over the past 7 days? ***Interviewer: you must read the options to the respondent and select all those that apply to him/her.***	/_____/ 1) We had no trouble getting enough to eat, 2) We ate fewer of our favourite foods 3) We skipped meals or ate less than usual, 4) We spent a whole day without eating
How many meals did you have with your family yesterday?	/_____/ 1) None, 2)One, 3)Two, 4)Three or more

IX. HUNGER SCALE (HHS)

The hunger scale is an index of household food deprivation. It is based on a series of strategic responses to the following questions:

In the **last [4 weeks/30 days]:**	**Response mode** 1) Rarely (1 to 2 times) 2) Sometimes (3 to 10 times) 3) Often (more than 10 times)
Was there ever a time when there was **no food to eat at home because of** a lack of resources to buy it? If so, how often did this happen?	/_____/ Yes/No /_____/ figure
Have you or any member of your household had **to go to bed hungry at night** because there wasn't enough food? food?	/_____/ Yes/No /_____/

If so, how often did this happen?	figure
Have you, or any member of your household, **gone a whole day and night without eating anything** because there wasn't enough food? If so, how often did this happen?	/_____/ Yes/No /_____/ figure

X. FOOD CONSUMPTION SCORE (FCS/SCA) & FOOD CONSUMPTION SCORE FOR NUTRITION ANALYSIS (FCS-N)

These questions refer to food groups consumed by the majority (50% +) of household members in the last 7 days.

NUMBER OF DAYS CONSUMED EACH FOOD PRODUCT/GROUP: The question asks about the number of days (not the number of times) that the majority of household members (50% or more) consumed foods from each of the eight food groups (plus condiments). Make sure the question includes the recall period. Answers can range from 0 to 7 days.

SMALL PORTIONS: If a food is consumed only as a condiment or in such small quantities (i.e. fish powder, grated cheese, and powdered milk), it cannot be considered an adequate portion and must be recorded under **condiments/spices**.

The table below provides examples of what constitutes a '**small quantity**' for each food group. The idea is that if a food is consumed only as a condiment, or in such a small quantity that it cannot be considered a portion by the household, then it should not be recorded.

Food products / groups	Example of quantity			
Meat, chicken , fish	A small piece (like a matchbox) for 3 people or more	Fish powder spread over meals	A piece of meat or half a piece of fish put in the sauce to add flavour to a soup.	
Egg	One egg for 2 people or more	Used eggs only as a condiment		
Milk	A spoonful of milk added to tea and/or coffee	1 glass or cup for 3 people or more	2 or 3 tablespoons milk powder added to coffee/tea	
Cheese	A little grated cheese on the dish	A small piece (like a matchbox) for 4 people or more		
Vegetables	1 or 2 tomatoes or onions as a condiment	Pickled cauliflower and/or carrot as a condiment	1 or 2 carrots, tomatoes, radishes, cucumbers, etc., for 4 people or more	A few leaves for everyone
Fruits	Fruit used to add flavour to the juice (such as a slice of lemon) added to a drink)	1 or 2 fruits for 4 people or more (i.e. small orange, mango, banana), apple)		

How many days in the last 7 days did most members of your household (50% +) eat the following foods, inside or outside the house?	Number of consumption days feed (0 - 7 days)
1) **Cereals, seeds, roots and tubers, such as**: sorghum, millet, maize, wheat, rice, bread/galette, fritters, flour, pasta, **cassava**, potatoes, sweet potatoes, yams, tubers and wild roots.	/_____/
2) **Legumes, nuts & oilseeds such as** beans, **peanuts**, soybeans, lentils, almonds and/or other nuts	/_____/
3) **Milk and other dairy products, such as**: fresh/sour milk, yogurt, cheese, other dairy products EXCEPT margarine/butter or small quantities of milk for tea/coffee (Powdered milk: only if glasses of powdered milk are consumed)	/_____/
4) **Meat, fish and eggs, such as**: goat, beef, chicken, pork, mutton, fish, including canned tuna, snails and/or other seafood, eggs (meat and fish consumed in large quantities and not as a condiment), termites, caterpillars (in large quantities).	/_____/
a) **Meat products, such as**: beef, pork, mutton, goat, rabbit, chicken, duck, other birds	/_____/
b) **Organ meat, such as**: liver, kidneys, heart and/or others offal	/_____/
c) **Fish/crustaceans, such as**: Fish, including canned tuna, and/or other seafood (large-scale fish, shellfish, etc.) quantity and not as a condiment)	/_____/
d) **Eggs**:	/_____/
5) **Vegetables and leaves, such as** carrots, red peppers, pumpkins, onions, tomatoes, cucumbers, green beans, peas, mushrooms, etc.	/_____/
a) **Orange vegetables (vegetables rich in vitamin A), such as** carrots, red peppers, orange sweet potatoes, etc.	/_____/
b) **Vegetables with dark green leaves, such as**: cassava, potato, cowpea, gnetum (koko) leaves, amaranth, spinach, jute, okra, etc..,	/_____/
6) **Fruits, such as**: banana, apple, lemon, mango, papaya, orange, grapefruit, tangerine, guava, passion f r u i t , etc.	/_____/
a) **Orange fruit (fruit rich in Vitamin A), such as**: mango, papaya, watermelon. [excluding oranges]	/_____/
7) **Oil/fat/butter**, such as: vegetable oil, palm oil, shea butter, margarine, other fats/oils.	/_____/

8) Sugar, or desserts, such as: sugar, honey, jam, cakes, candies, cookies, pastries, cakes and other sweets (sweetened beverages).	/_____/
Condiments/Spices, such as: Tea, coffee/cocoa, salt, garlic, spices, yeast/yeast, tomato/sauce, meat or fish as a condiment, condiments, including a small amount of milk/tea coffee.	/_____/

XI. REDUCED SURVIVAL STRATEGIES (rCSI - gender-based)

The rCSI is based on a series of responses (strategies) to the single question: "**What do you do when you don't have enough food and no money to buy it**?

rCSI combines :

- Frequency of each strategy (how many days was each strategy adopted?)
- Their severity (How serious is each strategy?)

⚠ **Remember**: these strategies are only applied when there is a shortage of food or money to buy it, and not for any other reason. Therefore, if the answers don't seem to match reality, remember to probe further and ask **why these strategies were applied** (making sure they explain that they didn't have enough food or money to buy more).

In the last 7 days, were there any days (and if so, how many) when your household had to resort to any of the following strategies (**to cope with a lack of food or money to buy it**)?	Frequency **(number of days from 0 to 7)**
a. Eat less-preferred, less-expensive foods	/_____/ figure
b. Borrowing food or relying on the help of parents/friends	/_____/ figure
c. Limit the portion eaten during meals	/_____/ figure
d. Reduce the quantities consumption by adults/mothers in favor of young children ➔ Sioui , which adult from your household limited his or her consumption so that children can eat?	/_____/ ▪ Mainly adult men ▪ Mainly adult women ▪ All adult sexes combined
e. Reduce the number of meals eaten per day (skip 1 or 2 meals a day)	/_____/ figure

XII. LIVELIHOOD ADAPTATION STRATEGY FOR FOOD NEEDS (LCS-FS) & BASIC NEEDS (LCS-EN)

The LCS has two forms of modules (which will be selected directly according to the household ID):

- LCS-FS "In the last 30 days, has the head of your household or a member of your household taken any action to cope with a **lack of food or money to buy food**?

- LCS-EN "Have the head of your household or any member of your household taken any action in the last 30 days to access **basic needs**?".

LCS-FS: In the past **30 days**, has any member of your household had to engage in any of the following activities because of a **lack of food or money to buy it?** ---------- **LCS-EN:** In the last **30 days**, has any member of your household had to engage in any of the following activities due to a **lack of resources to access basic needs (e.g. food, housing, education, health services, etc.)?**	10 = No, because we didn't need it 20 = No, because we have already exhausted this strategy over the past 12 months and no longer have the option of doing so. 30= Yes, we've had to apply this strategy over the past 30 days to meet our needs. 9999= Not applicable (does not have access to this strategy)	Severity indicative of strategy
1.1 Sale of non-productive assets (radio, furniture, television, jewelry, etc.)	| ___|	Stress
1.2 Reduce essential non-food expenditures such as education and health care because there was not enough food, or money to buy it	| ___|	Stress
1.3 Savings expenditure	| ___|	Stress
1.4 Borrow money from a lender official/bank	| ___|	Stress
1.5 Sold productive assets or means of transport (sewing machine, wheelbarrow, bicycle, car, etc.)	| ___|	Crisis
1.6 Entire household migrated in search of work	| ___|	Crisis
1.7 Children withdrawn from school	| ___|	Crisis
1.8 Sold house, plot or field	| ___|	Emergency
1.9 Begging (asking strangers f o r money/food on the street)	| ___|	Emergency

1.10 A member of the family has had to engage in risky or illegal income-generating activities (theft, selling the drugs, working with armed groups, prostitution, etc.).	| __|	Emergency

XIII. EXPENSES

Even if, for simplicity's sake, we call it an "expense module", we're actually asking two questions:

a. For items purchased, we ask what the household **bought** and **how much it spent** on these purchases.
b. For items not purchased, we ask what the household **consumed** and its value.

Our aim is to **quantify the value of what households consume**.

For this section, pay attention to the recall periods:

- For **food expenses**, the recall period is ***7 days.***
  - purchases (cash and credit)
  - donations or assistance in kind
  - *Own production: products gathered, hunted or received in exchange for w o r k*
- For **non-food consumer spending**, the recall period is **either the last 30 days or the last year.**
  last 6 months; the sources are :
  - purchases (cash and credit)
  - donations or assistance in kind

⚠ **Reminders**:

- We need to capture spending on goods, but also on services (e.g. hairdressing, medicine).
- Do not declare the same expenses twice in different groups different (e.g. fuel)
- Significant expenses are not included (e.g., the purchase of vehicles, telephones)
- Do not declare expenses incurred for resources and company investments (including e.g. field rent)
- Household expenses
- Be careful with zeros when entering values (e.g.., make sure you don't write 1,000 instead of 10,000!)

Source	**Clarifications**
1) Purchase in cash or credit :	▪ **Cash**: also includes value vouchers; the source of the cash is irrelevant (e.g. different treatment of purchases made with cash). **Credit**: when the household buys something now but pays it back later. ▪ **For household consumption: this** means that we do not take into account purchases made for gifts or food. animals. ▪ We want to know what was actually spent on the purchase, regardless of the quantity consumed ▪ For purchases made on credit, indicate the amount the household will have to repay in the future → do not indicate zero.
2) donations in kind or of a	▪ **In-kind aid and gifts include**: NGOs, UN agencies, government; religious authorities; gifts from family and friends ; loans from family and friends; begging.

assistance in kind?	▪ How much in-kind assistance or gifts **the** household **consumed**. *This is not a simple reception without consumption!* ▪ Estimate the equivalent cost of the item received, if he had to buy it himself. ▪ If a specific item does not exist on the local market, the estimate should be based on the value of comparable items.
3) clean production	▪ **Own production**: includes food produced on the farm or in the household garden, harvested and hunted in fields, forests, rivers and lakes, sea, etc., but also food received in exchange for work (for example, as part of remuneration for salaried agricultural work). ▪ We want to know whether the household consumed something it produced itself, not whether it simply produced or obtained it without the consume! ▪ It doesn't matter when the food was produced, only when it was consumed. For example, *if in the last 7 days, the household has consumed food from the stocks of a previous production, this must be taken into account when calculating the value of the food.* ▪ The use of the terms "gathered, hunted or fished" depends on each specific food group.

A) **FOOD CONSUMPTION EXPENSES (7 days)**

I'm now going to ask you some questions about your spending and consumption of **food products.** Over the **past 7 days**, has your household **1) purchased** (cash or credit) ... **2) consumed** .... **from gifts in kind or assistance in kind?** **3) consumed** ... **that you produced, picked/picked/fished or received in exchange for work?**	
Face to Face (1) cereals, (2) tubers, (3) legumes/nuts, (4) vegetables, (5) fruit, (6) meat, (7) fish, (8) fats, (9) milk/dairy products, (10) eggs, (11) sugars, (12) condiments, (13) alcoholic beverages, and (14) snacks and meals prepared at Outside the house	Remote/ à distance 1) staple foods (such as cereals, tubers, pulses) 2) protein-rich foods (such as meat, eggs, fish, milk and dairy products) 3) fruit and vegetables 4) other food products (oil, sugar, nuts, sweets, condiments, drinks, etc.)
If the answer to the question is "YES", then the household is asked to estimate the value of this food in local species	

B) **NON-FOOD CONSUMPTION EXPENSES (30 Days)**

These include: soap, transport, firewood/charcoal, rent, paraffin/fuel and alcohol/tobacco, water, electricity, communication, leisure.

I'm now going to ask you some questions about your spending and consumption of non-food products. Over the **past** 30 **days**, has your household **1) purchased** (cash or credit) … **2) consumed** …. **from gifts in kind or assistance in kind?**	
Face to Face (1) Hygiene products and services, (2) Transport-related goods and services (3) Fuel, (4) Domestic water supply, (5) Electricity, (6) Other energy sources for cooking and heating, lighting, etc., (7) Housing-related services, (8) Communication, (9) Leisure, sports and cultural goods and services, (10) Alcohol, tobacco	Remote/ à distance 1) hygiene and personal care products 2) transport and communications 3) housing and public services 4) tobacco and alcohol
If the answer to the question is "YES", then the household is asked to estimate the value of this food in local species	

NB: services related to housing during the last 30 days include items such as**: waste collection, sewage collection, maintenance costs in communal buildings, security services, helpers such as cleaners and gardeners.**

C) **NON-FOOD CONSUMPTION EXPENSES (6 months)**

These include: health services, medicines, clothing/shoes, education services, goods, etc. education, rent, non-durable furniture/household goods, routine maintenance services.

I'm now going to ask you about your spending and consumption of other non-food products and services. Over the **past** 30 **days**, has your household **3) purchased** (cash or credit) … **4) consumed** …. **from gifts in kind or assistance in kind?**	
Face to Face (1) Health services, (2) Medicines and health products, (3) Clothing and footwear, (4) Educational services, (5) Educational goods, (6) Rent, (7) Non-durable household furniture and utensils, (8) Household repairs/do-it-yourself.	Remote/ à distance 1) education, health and clothing
If the answer to the question is "YES", then the household is asked to estimate the value of this food in local species	

For this section, if the person has difficulty remembering the amount spent :

- *Break down the question for the most important items in an expense group (for example, ask about their purchases cassava, bread, etc. flour for the "cereals" group).*
- *Break down the reminder period: for example, for a 30-day reminder, ask about the last 7 days only - then about the last 2 weeks, etc.*
- *If the above two strategies don't work, try to get an estimate of what they would consume/spend "Then determine whether the last 7/30 days are different from the usual situation and adjust accordingly.*

⚠ **Reminders**:

- For food and non-food items, we start by asking: "In the last [XX] days, has your household **purchased any item** with cash or credit?
- If yes, we ask for the value.
- We then ask questions about the **use of items (products and services)** from donations or in-kind support.
- Only here will we attempt to estimate the value of items that have been "used" but not purchased -> only when they have been received in the form of in-kind assistance or donations.

XIV. ASSISTANCE (ENA)

This section concerns cash assistance received by the household in the last 3 months. This represents: **cash assistance includes cash as well as food stamps, paper or electronic; if the respondent answers "no", ask about food stamps.**

Assistance	Answers
Has your household **received cash assistance from WFP** in the last three years? in recent months?	/_____/ Yes/No
If yes, how much cash assistance have you received from **WFP** in the last two years? (in local currency)	/_____/ figure
Has your household received cash assistance **from other agencies?** **or NGOs** in the last three months?	/_____/ Figures
How much money have you received from **other United Nations agencies or in** the last three months?	/_____/ Figures
Did your household receive cash assistance from **other sources (family/relatives, friends, community or religious organizations)** at in the last three months?	/_____/ Yes/No
If yes, how much cash assistance have you received in the last three months **from sources other than WFP and other agencies?** **and NGOs**?	/_____/ Numbe r
Thinking only of the last time you received cash assistance, approximately how much of it did you use **to purchase food, non-food items and services for your household's everyday consumption**? NB: Please exclude money used for : the purchase of inputs, goods and labor for activities productive sectors such as agriculture and family businesses -send cash or gifts to other households	/_____/ **a percentage from 0% to 100%**

-pay off debts or set aside for future needs -pay for ceremonies, vehicles, large pieces of furniture or other major expenses -pay taxes	

XV. SOURCES OF INCOME

Ask several questions to understand the different sources of household income and how many people work. If you have a clear idea of the sources of income at the beginning of the section, it will be easier to answer the questions.

Answers **Answer codes for "source of income** 1) Salaried work - Professional, 2) Skilled labor wages, 3) Labor wages - **unskilled/casual/agricultural**, 4) Salary - **unskilled/occasional/non-agricultural**, 5)Pensions, 6) Remittances, [usually from family or friends abroad]. 7) Help/donations, 8) Borrowing money/living off your debts, 9) High-risk activities (e.g. begging, sweeping up, garbage collection), 10) Savings/sale of goods, 11) Small shop/sale on the street, 12) Small business (sole proprietorship), 13)Medium/large business (sole proprietorship), 14) Small-scale agricultural production including livestock (own land/livestock), fishing and hunting 15) Medium/large agricultural production including livestock (own land/livestock), fishing and hunting 14)Other (specify) -> *Use only other (specify), if the activity is really different from those listed.*	⚠ **Reminder**: • Try as far as possible to avoid using the "other" choice and make sure that the option you choose is not already covered by another existing option -> reread the existing options and choose the best answer. • If necessary, use the "other" category and ask yourself whether you have provided enough information for someone else to understand and recode (during analysis). • For example, in the sources of income section, an answer such as "chauffeur" provides no information on the method of payment, i.e. whether the chauffeur is paid monthly as part of a stable job by a company, or whether he or she is simply casual.
What is the occupation of the head of household?	/___/ Open text
How many household members contribute to the household ? (persons)	/___/ figure
How many sources of income does your household have? *Please indicate the total number of revenue sources by type There may be more than one income earner within a household, and an individual may also have more than one different source of income (or none at all); income may also be linked to the household rather than the individual (e.g. remittances or aid).*	/___/
What is **the** household's **main source of income**?	/___/ VIEW OPTIONS

IT IS THE MOST STABLE SOURCE OF INCOME FOR THE HOUSEHOLD	
Relative contribution to total household income from this source (1)re	/___/ (%) From 0% to 100%
What is **the** household's **second source of income**?	/___/ VIEW OPTIONS
Relative contribution to total household income from this source (2ème) second	/___/ (%) From 0% to 100%
What is **the** household's **third source of income**?	/___/ VIEW OPTIONS
Relative contribution to total household income from this source (3)ème	/___/ (%) From 0% to 100%
Share of income contributed by female members of pensionable age work	/___/
Share of income contributed by children in the household (under 15)	/___/
Has income changed over the past year? ***(Ignore currency devaluation).***	/___/ 1) No change, 2) Increased, 3)Reduced by less than 25%, 4)Reduced by more than 25% and less than 50%, 5)Reduced by more than 50%.

Do not repeat *the same source of income twice (sum the proportion value if two people are involved in the same source of income and select only one source).*

XVI. EXPERIENCE-BASED FOOD INSECURITY SCALE (FIES)

The FIES is based on direct responses to a set of 8 questions about actual experiences in obtaining food (borrowed from the FAO) over the past 30 days.

I'd now like to ask you a few questions about food. In the **last 30 days**, has there been a time when :	**Answer** 1. No 2. Yes 3. Don't know 4. Refused
FE1. **Have** you or other members of your household **been worried about not having enough food** ***for lack o f money or other r e a s o n s ? resources***.	/_____/
FE2. You or other members of your household **have been unable to eat healthy, nutritious food** ***for lack of money or other resources***?	/_____/
FE3. You or other members of your household **ate only a few kinds of food** (not very varied) ***for lack of money or other reasons. resources***?	/_____/
FE4. You or other members of your household **had to skip a meal** because you didn't have enough ***money or other resources to buy food***?	/_____/

FE5. You or other members of your household **ate less than you thought you should have** because of ***a lack of money or other resources***?	/_____/
FE6. Did your household run out of food ***for lack of money or other resources***? If so, how many times has this happened in the last [4 weeks/30 days]?	/_____/ /_____/ figure
FE7. **Were** you or others in your household **hungry but did not eat** because there was ***not enough money or other resources to eat***? If so, how many times has this happened in the last [4 weeks/30 days]?	/_____/ /_____/ figure
FE8. Did you or other members of your household **go a whole day without eating** for ***lack of money or other resources***? If so, how many times has this happened in the last [4 weeks/30 days]?	/_____/ /_____/ figure

XVII. ACCOMMODATION (Basic)

Housing concerns questions relating to :

- **Type of housing unit**: House, Apartment, Hut/Case, Tarpaulin, Traditional tent (straw, fabric), Canvas tent, Leather tent, Unsanitary shelter (factory/ warehouse/ garage/ workshop/ building site/)
  unfinished building), Collective shelter, No shelter (sleeping outdoors), Other (specify)
  - ***NB: If possible, don't ask, just answer according to your observations.***
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **Housing status** : Owner, Co-owner, Tenant (written agreement or no written agreement), Roommate with other households, Staying in a family home, Housing linked to
  Employment, Plot or permit holder, Free stay (written agreement or no written agreement), Other (specify)
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **Number of rooms used by the household (excluding kitchen and bathroom) -> ask the question.**
- **What is the main building material used for exterior walls**? Baked or unfired bricks, cement, stone, wood, mud, corrugated materials (semi-rigid), plastic sheets (semi-rigid),
  Bamboo/palm tree, Straw, Iron/Zinc leaf, Other (specify)
  - ***NB: If possible, don't ask, just answer according to your observations.***
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **What is the main roof material**? No roof, Stubble/palm leaf, Grass, Rustic carpet Palm/bamboo, Wooden planks, Cardboard, Metal/tin, Wooden planks, Calamine/cement fiber,
  Ceramic tiles, Cement, Roofing shingles, Don't know Other (specify) ;
  - ***NB: If possible, don't ask, just answer according to your observations.***

- ***Avoid using other (please specify)! Find the best answer from the options provided!***

- **What is the main flooring material**? Earth/sand, Manure, Wood planks, Palm/bamboo, Parquet or polished wood, Vinyl or asphalt strips, Ceramic tiles, Cement Carpet, Other (please specify)
  - ***NB: If possible, don't ask, just answer according to your observations.***
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **What is the main type of toilet used by your household**: Flush in the piped sewage system, Flush/air flush in a septic tank, Flush/air flush in a septic tank, Flush/air flush in a septic tank, Flush/air flush in a septic tank, Flush/air flush in a septic tank, Flush/air flush in a septic tank.

  pit latrine, open sewer flush/air, I don't know where flush/air, ventilated improved pit latrine, pit latrine with slab, pit latrine without slab/open pit, composting toilet, bucket, hanging toilet/hanging latrine, no installation/ bush/ field, other (specify).
  - **Strategy**: ask to use their toilet to observe it directly (if possible).
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
  - **Your household shares them with other households (yes/no)**
- **What does this household use most of the time for cooking, making tea/coffee, boiling drinking water? Please tell me which stove or appliance is used most of the time**:

  No food cooking in the household, Solar stove (thermal energy from the sun, no solar panels), Electric stove, Natural gas stove, Biogas cooker, Liquefied petroleum gas (LPG)/ cooking gas cooker, Liquid fuel cooker, Manufactured solid fuel cooker, Traditional solid fuel cooker (not manufactured), Mobile cooker, Three-stone stove/open fire, Other (specify)
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **What is the main source of energy used by your household for cooking**? Alcohol/ethanol, Gasoline/Diesel (not in generator), Kerosene/Paraffin, Coal/Lignite, Charcoal, Wood (collected), Wood (purchased/distributed), Straw/shrubs/grass, Agricultural crops, Animal manure, Processed biomass (pellets) or wood chips, Garbage/plastic, Sawdust, Other (specify)
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***
- **What is the main source of lighting used by your household:** No lighting in the household, Electricity (including solar mini-grids, hybrid mini-grids and national grids),

  Electricity (from diesel generator) Electricity (solar home system), Solar-powered lantern or flashlight, Rechargeable flashlight/mobile/torch or lantern, Battery-powered flashlight/torch or lantern, Biogas lamp, LPG lamp, Gasoline lamp, Kerosene or kerosene lamp, Oil lamp, Candle, Open fire (wood, charcoal, straw, etc.), Other (specify)
  - ***Avoid using other (please specify)! Find the best answer from the options provided!***

XVIII. WATER

This section asks questions about the main water source, its location and accessibility.

- **What is your household's MAIN source of drinking water**: Piping in the house, Piping in the yard/ground, Piping to the neighbor, Public tap/pipe

water supply, Tube well/borehole, Protected dug well, Unprotected dug well, Protected spring, Unprotected spring, Rainwater collection, Water truck/seller, Trolley with small tank/drum, Surface water (river, stream, pond, dam, canal), Bottled water, Bagged water, Water kiosk, Other (specify)

- **What is the location of your MAIN water source**: In your own home, In your own yard/parcel, Elsewhere
- **Distance from the water source to your home (minutes)** : *Ask them to consider their usual means of transport when estimating the time.*

XIX. HOUSEHOLD ASSETS

This section concerns the goods owned and operated by your household. These are answer the following question and directly list and cross-reference all the items they own:

- **Does your household own any of the following simple household items**?
  - Benches/Stools, Bed/mattress, Rickshaw, Cart/Charrue, Chairs Small Agricultural tools (Daba, hoe, Machete/Hache)
- **Does your household own any of the following basic household electrical appliances**?
  - Radio, Telephone (mobile), Refrigerator, Manual agricultural processing machine (dough mill), motor pump
- **Does your household own any of the following advanced household electrical appliances**?
  - Television, Sewing machine, Motorized processing machine (cassava mill) solar panels, TV Decoder
- **Does your household own any of the following means of transport**?
  - Bicycle, Motorcycle, Dugout, Car/truck

NB: Read them the options and select all that apply.

XX. SECURITY

This section concerns the household's perception of safety. It involves asking the questions [yes/no]:

- Does your household currently feel safe in its environment?
- Has your household experienced insecurity or violence in the last six months?
- In the past six months, has any member of this household ever felt discriminated against for reasons such as religion, gender, skin color, sexual preference, illness or disability, and other socio-economic factors?

XXI. MINIMUM INDIVIDUAL FOOD DIVERSITY (MDDW)

This section relates to the **respondent's individual consumption** of food and beverages consumed yesterday during the day or night, whether eaten or drunk (even if the food consumed was combined with other foods) at home or elsewhere. Include small meals as well as main meals.

I'll be asking you about different foods and drinks, and I'd like to know if you ate the food in question, even if it was combined with other foods. Yesterday, during day or night, did you eat or drink :	
Food	**Possible answers**
Cereal-based foods such as :	Sorghum, millet, maize, wheat, rice, bread/galette, fritters, flour, pasta
White roots and tubers or plantains like :	Cassava, potato, yams, taro, wild tubers and roots

Legumes (beans, peas and lentils) and oilseeds :	Beans, Peanuts, Peas, Lentils, Almonds, and/or other nut
Nuts and seeds such as :	Peanut, palm nut
Dairy products such as :	Fresh/sour milk, yoghurt, cheese, other dairy products EXCEPT margarine/butter or small quantities of milk for tea/coffee (Powdered milk: only if glasses of powdered milk are available). powder are consumed)
Offal such as :	Liver, kidney, heart, kidney, gizzard or other offal
Red meat from mammals as :	Beef, pork, goat, mutton, rabbit, meat from bush
Processed meats such as :	Sausage, minced meat
Poultry and other white meats such as :	Chicken, duck, goose, guinea fowl
Fish and seafood such as :	Fish, shellfish, shrimp, frozen or dried,
Poultry or other bird eggs	
Dark green leafy vegetables such as :	Cassava leaves, potatoes, cowpeas, gnetum (koko), amaranth, spinach, okra, jute.
Vegetables, roots and tubers rich in vitamin A as in :	Pumpkins, carrots, squash or sweet potatoes
Fruits rich in vitamin A such as :	Mango ripe, papaya papaya, tangerine, grapefruit, guava
Other vegetables such as :	Cabbage, celery, parsley, cucumbers, eggplant, zucchini, tomatoes, mushrooms, green beans, pea
Other fruits such as :	Apple, avocado, banana, baobab fruit, pineapple, orange, watermelon, guava, grapefruit, mandarin, lemon.
Specialized nutritional foods (SNF) for women like :	Super cereals or other Super Cereals with PAM CSB+ specification

REMINDER: YOU'RE PART OF A TEAM!!!

CALL YOUR TEAM LEADER OR SUPERVISOR OR THE STUDY COORDINATORS IF YOU HAVE ANY QUESTIONS. PROBLEMS OR QUESTIONS - NO QUESTION IS TOO SMALL!
GOOD LUCK!!!

XXII Appendix: Remote telephone survey manual

This appendix describes the rules of conduct and call protocol. Please study and follow them carefully.

XXII.1 Rules of conduct

Please take note of the following rules of conduct to ensure that calls are administered in a professional manner.

XXII.1.1 Before the call

There are several things you need to prepare before you even start dialing a number to launch an investigation. You need to make sure that you're in a suitable environment for your calls, i.e. that there are no disturbances around you. You also need to make sure that the equipment you'll be using for the interview - your phone and tablets - is in working order. Phone interviews require you to be very attentive, otherwise you risk missing something, so it's important that you have everything prepared before you start. In particular:

- Try to be in a private place
- Let your family know what you'll be doing, so as not to be disturbed. If possible, choose a private room. It's important to minimize distractions, so your caller doesn't get bored or frustrated and hang up on you.
- Make sure your phone is ready, fully charged and open for the first household you're going to interview.

XXII.1.2 Initiating the call

When you start dialing, you MUST BE PREPARED to speak. You mustn't keep your respondent waiting on the phone once they've picked up; your attention must be focused on the call at all times.

- Don't be distracted by your surroundings.
- DO NOT keep the respondent waiting

You have different numbers to call for each household. In your telephone (ODK), you'll find the number(s) of the household members. Remember that you need to speak to a member of the household who is at least 15 years old (but make sure they know all the household consumption & expenditure info). If the interviewee is younger, you'll need to persuade them to put you in touch with an adult member of the household.

Don't forget to be ready to answer as soon as the respondent picks up the phone. Start with :

> *"Hello sir/madam, **my name is [EnuName_Display]**, and I'm calling from , at the on behalf of **the United Nations World Food Program**. We are calling you to conduct a telephone interview to better understand the household food security situation. During this interview, we are seeking **information about** the **food security**, livelihoods and general living conditions of you and your household, which will help us to improve the tools used to assess households. Your household has been randomly selected in this region to participate in the study.*
>
> *All information you provide will remain **strictly confidential** and will not be passed on to others. The result of this information **is in NO WAY related to food aid**. This is a **voluntary** process, and you may choose not to answer any or all of the questions if you wish. However, we hope you will participate, because*

***your opinion is important**. Your participation is greatly appreciated and will not influence your assistance status (assisted or unassisted).*

*The interview will last approximately (maximum) **30 minutes**. The call **will be recorded** for quality control purposes.*
data only."

Introduce yourself and the survey, and make sure everything is understood. Reassure respondents that their answers will remain confidential and that they will receive a telephone credit at the end of the call. It's okay if respondents don't want to participate. Ask them if they're available on another day/time.

XXII.1.3 Label

- Speak clearly and confidently.
- Pause briefly if you're reading a long sentence.
- Keep your tone of voice at an appropriate level and hold it there.
- Take the time to read each question slowly.
- Do NOT engage the respondent in political discussions or discussions unrelated to the survey.
- Make sure you address the person who picks up the phone with respect, even if it's a child.
- DO NOT chew gum or eat over the phone.
- Maintain a high level of professionalism at all times; remember that you represent the World Food Programme.
- Emphasize the importance of the survey in avoiding and minimizing the number of refusals.
- Be patient: You know the questionnaire, but not the respondent. Expect the respondent to have a few questions. Read the questions slowly and give the respondent time to answer.
- **Listen up**! Listening is extremely important when conducting a survey. It's even more important in the case of a telephone survey, as you need to determine from the respondent's voice whether they want to participate, whether they have any doubts, and so on. Depending on the respondent's mood, you need to adapt the pace of the interview. Listen carefully to determine this. Also listen carefully if the interviewee has any objections to the survey, so that you can respond to them.
- Never assume you know the respondents' answers, and never answer for them.
- Don't judge. Remain neutral throughout the conversation. Don't judge the interviewee's answers if you don't agree with them, or if you think it's obvious that the interviewee should know.
- Record information correctly. It's best to put your phone on speaker so that your hands are free for typing. If you have to type the answer to an open-ended question, you can repeat what the respondent says as you type.
- No questions other than those listed in the script should be included.

Do NOT make promises to the respondent or lie to them just to get them to participate.

XXII.2 Call protocol

We will need to make a high volume of calls to reach the required number of completed surveys. Strict adherence to the call protocol will help to increase success rates.

XXII.2.1 Call attempts

The respondent will be called as many times as necessary (up to **20 times or more** over several days, with a **maximum of 6 working days**).

Each call attempt is treated as a separate survey. This means that for each attempt, you must select the correct call status option (as shown below), and **even if you were unable to reach the respondent, you save, finalize and upload the survey to MODA** as if it were a fully completed survey.

Please select one of the call status options below for each call attempt you make:

- Did not pick up / no answer / number busy
- Agreed to be interviewed
- Refused to be interviewed
- Did not connect/ network problems
- Invalid or inactive number
- Other (please specify)

Even if you have the impression that the phone number is invalid or inactive, continue to try it out like all the other phone numbers, following the protocol described below.

XXII.2.2 Calling hours (days and times)

We will conduct surveys during working and non-working hours.

We try to contact respondents also outside working hours to improve the chances of reaching those who would only be available outside normal working hours.

XXII.2.3 Maximum number of calls

The maximum number of calls to the respondent will be 20, spread over a maximum of 6 days. After the 20th attempt, the survey will be abandoned. For calls starting on the morning of Day 1, attempts will be as follows:

Day	Attempts	Schedule	Contact us	Who's calling?
Day 1	5	Morning (2), noon (1) & evening (2)	Primary number	enumerator
Day 2	0	Skip/Saute	Skip/Saute	Skip/Saute
Day 3	5	Morning, noon and evening	Scroll through the numbers, including the principal	enumerator
Day 4	5	Morning, noon and evening	Browse numbers, including the main number	enumerator
Day 5	0	Skip/Saute	Skip/Saute	Skip/Saute
Day 6	5	Morning, noon and evening	Scroll through the numbers, including the principal	enumerator

**Make sure at least one attempt is made on Sunday.

XXII.2.4 Minimum time between calls

We'll make a maximum of five attempts during the day. The times of the three calls should be 1) 2 in the morning, 2) 1 at lunchtime and 3) 2 in the evening. Here's the time breakdown:

-Morning: 08:00-12:00
-Noon: 12:00-15:00
-Evening: 15:00-20:00

If the first two attempts take place in the morning, they should be rescheduled 4 hours later, so that the next attempt takes place at lunchtime. The last attempts of the day will take place around 3 hours after the second attempt (ideally one in the afternoon, then another in the evening).

If you try unsuccessfully to reach a caller just before a skip day, please open the calendar and reschedule the call to the next call day (after the skip day) and schedule it for the morning, i.e. 8 a.m.

XXII.2.5 Variation of call times for successive calls

Call at lunchtime if the initial call was made in the morning (successive attempts in the same day must be made at 4 and 3 hour intervals respectively, as indicated above). Call the next morning if the initial call was made in the evening, etc.

XXII.2.6 Numbering protocol

Let it ring for at least one minute (60 seconds) before hanging up.

XXII.2.7 When to switch from one number to another

All numbers must be attempted for the maximum number of calls specified in this call protocol, even if the number is invalid, busy or switched off. For complete investigations, they will be removed from the files as soon as the investigation has been completed.

For refusals, they will be reassigned to the supervisor after the first attempt and will only be deleted once the supervisor has called and spoken to the respondent.
